PROFESSIONAL SUMMARY

AI/ML Engineering undergraduate (B.Tech) with a strong foundation in Python, Machine Learning, and LLMs. Hands-on experience developing conversational AI agents. Certified in ML/AI by IBM. Seeking to leverage skills in algorithms, data structures, and neural networks for an entry-level AI Engineering role.

TECHNICAL SKILLS

- **Languages:** Python, SQL
- **Machine Learning & AI:** TensorFlow, Scikit-learn, Pandas, NumPy, Computer Vision, NLP, Large Language Models (LLMs).
- **Tools & Platforms:** Google Antigravity, GitHub, Cursor, KNIME, Jupyter Notebooks, VS Code.
- **Soft Skills:** Leadership, Critical Thinking, Public Speaking, Technical Documentation.

TECHNICAL PROJECTS

AI Chatbot (RTX 4090) | Academic Project

- Architected a local agent utilizing LangChain for prompt orchestration and document retrieval.
- Integrated Hugging Face and Ollama for high-performance, private local inference.
- Developed a responsive UI using React and leveraged Python for hardware-accelerated processing.

Traffic Flow Prediction Model | Academic Project

- Developed a Machine Learning model to predict local traffic flow patterns, utilizing manually collected real-world dataset.
- Collaborated with a team of 3 to handle end-to-end data processing, feature engineering, and predictive modeling for a mathematics and statistics application.

Feedback Converter (NLP) | Personal

- Engineered an NLP pipeline to convert negative user feedback into constructive language while preserving positive context.
- Implemented NLTK-based Tokenization & VADER Sentiment Analysis to identify and process sentence-level polarity.
- Developed an interactive Streamlit Web Application for real-time feedback processing and seamless text reconstruction.

EDUCATION

B.Tech in Computer Science (AI & ML) | Jain University, Bengaluru | 2024 – 2028

- Relevant Coursework: Data Structures, Algorithms, Operating Systems, Artificial Intelligence.

CERTIFICATIONS

Machine Learning & Intro to AI (IBM), Algorithms on Graph (UC San Diego), Intro to OS: Virtualization (Codio), Python (HackerRank).

PROFESSIONAL DEVELOPMENT

- **Events:** Civo Navigate (2025) - Cloud Innovation, Kubernetes, Cloud-native tools & DevOps Practices.

LANGUAGES

- English (Fluent)
- Hindi (Fluent)
- Kannada (Fluent)
- Tamil (Fluent)
- Telugu (Basic)
